

JOHN LENNON

Imagine there's no heaven
It's easy if you try
No hell below us
Above us only sky

IF WE TAKE SERIOUSLY THE WORDS OF
"IMAGINE," WHAT BECOMES OF...

Free Will & Rationality

If the sky is all that's above us,
then the only causes of all that
happens are natural causes.
There's no God or spiritual realities
to cause anything.

THIS MEANS THAT

Everything—the thoughts that we have, the
choices that we make, and the loves that
we feel—is caused solely by the physical
forces at work in nature.

So, our thoughts, choices, and loves are nothing more than brain
chemistry. Everything is driven by biology. Brain chemistry makes
some love their children and others abuse them.

BRAIN CHEMISTRY MAKES SOME TO BE ATHEISTS AND OTHERS CHRISTIANS

Some who say that it's all "brain chemistry"
deny free will exists. If that's that's so, then
their thoughts are never rational or free but
only the product of their brain chemistry!

**When we seek freedom
from God, we become
slaves to lesser things.**
